

# Iceberg lettuce

*Lactuca sativa* L.

## Bakel

HR: Bl: 1 – 28, Nr: 0.

Large variety. Slightly flat-round head. Insusceptible against heat and very robust against tipburn. Due to its vigorous growth, only recommended for heavy soils.

## Gondar

HR: Bl: 1 – 28, Nr: 0.

Very voluminous variety for all locations. The flat-round heads are easy to pack and lie secure in boxes. Very long harvesting period because of early closing heads, which fill slowly from the inside.

## Raptor

HR: Bl: 1 – 28, Nr: 0.

Large, flat-round iceberg lettuce. Suitable for packing in foil or for direct marketing with external leaves. Very long harvesting period because of its high robustness against bolting and the slowly filling heads.

## Bedford

HR: Bl: 1 – 28, Nr: 0.

Medium-large, round type with regular layering of leaves. For year-round cultivation.

## Calmar

Amateur variety. Cultivation from spring until autumn.
