

# Eggplants

*Solanum melongena* L.

## Normal size

### **Elisa, F<sub>1</sub>**

Very early, round-oval eggplant. The firm fruit is dark violet and shiny. Can be harvested over a long period. Calyx has only a few spines. Also very suitable for the resale of seedlings.

## Mini eggplants

### **Ophelia, F<sub>1</sub>**

Early mini eggplant. Can be harvested in clusters with about 3 fruits or as single fruit (approx. 60 g). Compact growth habit with decorative foliage and inflorescence. Very suitable for amateur gardeners as a seedling as well as for container cultivation with 3–5 sprouts.

### **Orlando, F<sub>1</sub>**

Mini eggplant with dark violet, long, cylindrical fruits. The fruits—approx. 12 cm long—weigh about 50 g. High-yielding variety for professional cultivation or for container cultivation. Popular in Mediterranean cuisine.
