

# Sweet corn

*Zea mays* L.

## **Vanilla Sweet, F<sub>1</sub>**

Variety with early maturity for the fresh market. Exceptionally sweet taste and very tender bite. Approx. 21 cm long cobs with 16 kernels per ring. Nice tip fill. Very suitable for eating as raw fruit and therefore ideal for direct marketing.

## **Sweet Nugget, F<sub>1</sub>**

Extra sweet, very early variety. Length of cobs: approx. 20–22 cm, cylindrical. Productive, for the fresh market.

## **Tatonka, F<sub>1</sub>**

Extra sweet variety with early maturity. Good standing ability and an outstanding golden colour. Cobs with good tip fill. Length: approx. 21 cm with 14 kernels per ring. For the fresh market and industry.

## **Picabo, F<sub>1</sub>**

Variety with mid-early maturity with 18 kernels per ring. Cobs with good tip fill and a length of 20 cm. Extra sweet taste. For the fresh market and industry.

## **Tasty Sweet, F<sub>1</sub>**

Extra sweet hybrid with high performance and medium early maturity. Cob length: approx. 21 cm, cylindrical, excellent quality for the fresh market. Regular tip fill up to the top.
