

Chives

Allium schoenoprasum L.

Polyfine

Medium-fine blades, very upright growth with good regenerative capability. Very robust and insensitive as winter forcing crop.

Middleman

Medium-rough blades, upright plant habit. For the fresh market and pot cultivation in the glasshouse.

Polystar

Fast growing selection with medium-rough blades, recommended for early harvest in open fields as well as for pot cultivation.

Hi 08 881 SL

Seed for trial cultivation. Filed for registration. Dark green, very quick growing and vigorous selection with medium-rough to rough blades. Suitable for the fresh market and industry.

Grande

Seed for trial cultivation. Filed for registration. Selection with rough, dark green blades. Upright plant habit. Suitable for the fresh market and industry.

Polyvit

Vigorous and upright growth, uniform sprouting. Dark green with medium-rough blades, high yielding. Very good results in forcing.

Polyvert

Very dark green selection, rough blades, thick-walled, very upright growth. Excellent for the fresh market, forcing and industry.

Garlic chives

Allium tuberosum Rottler ex Spreng.

Shiva

Very vigorous and high-yielding variety with pleasant garlic taste. Utilisation of fresh leaves – similar to chives. The stalks remain healthy and will sprout again after cutting. Annual to biennial.
