

Onions

Bunching onions

Allium fistulosum L.

Hi 08 524 ONX

Seed for trial cultivation. Filed for registration. Early, long-shafted bunching onion for year-round cultivation in open fields with sowing from February until mid July. Vigorous selection with particularly dark green and flexible foliage. Easy to bundle because of its high cleaning efficiency and uniformity. Not winter hardy.

Damast

Bunching onion with very dark green, tight, upright foliage and a white shaft, good for bunching. High harvesting productivity due to uniform, medium-coarse plants and a high cleaning efficiency. Compact growth habit for year-round cultivation in open fields. Especially recommended for autumn harvest because of good plant health on the field. Not winter hardy.

Hi 08 527

Seed for trial cultivation. Filed for registration. IR: Foc, Pt. Winter hardy, upright, intermediate type with slight bulb swelling. Very vigorous growth with dark and robust foliage. Convinces with uniformity and robustness against bolting.
